Office Action Summary

Application No.

09/848,519

Applicant(s)

BESHORE, DAVID G.

Examiner

Johnna R. Loftis

Art Unit

3623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. The following is a non-final office action upon examination of application number 09/848,519. Claims 1 and 15 have been amended. Claims 1-20 are pending and have been examined on the merits discussed below.

Response to Arguments

2. Applicant's arguments, filed 9/22/05, with respect to the rejection(s) of claim(s) 1-20 under 35 USC 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the WAGICS Evaluation Report.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the characterization of the findings including a strength and a weakness are considered indefinite since what may be a strength to one person may be a weakness to another. Characterizing the findings as a strength or a weakness is purely subjective. Correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the WAGICS Evaluation Report.

As per claim 1, WAGICS Evaluation Report teaches acquiring information concerning the organization and the process (table 3, page 6 – the principles that are evaluated are inherently reflective of the organization and the process); developing a plurality of preliminary findings based upon the information, wherein each preliminary finding has an associated characterization selected from a group consisting of a strength and a weakness (table 3, page 6 – the principles that are evaluated are inherently reflective of the organization and the process; while the principles listed in the WAGICS Evaluation Report mostly reflect strengths of the workshop, characterization of strength and weakness is very subjective and what one views as a strength might be characterized as a weakness to another. For example, the third principle, regarding feminist principles, could be viewed as either a strength or weakness of the workshop. Therefore, inherently, the WAGICS Evaluation Report includes strengths and weaknesses of the workshop for evaluation); voting for a conclusion associated with each preliminary finding, and wherein the conclusion associated with each preliminary finding is selected from a group consisting of an agreement with the preliminary finding and a disagreement with the preliminary finding (table 3, page 6 – participants assess their agreement or disagreement with each of the

Art Unit: 3623

principles); and developing a plurality of final findings, wherein each final finding has the characterization, and wherein the plurality of final findings are based upon said voting for the conclusion associated with each preliminary finding (table 3, page 6 – the table reflects the final findings wherein percentages are used to show overall agreement or disagreement with each of the principles). While the WAGICS Evaluation Report does not disclose that the voting occurs electronically, it is old and well known in the art of survey and evaluation to collect responses in several methods including electronic form. It would have been obvious to one of ordinary skill in the art to perform the voting step electronically to speed the process and to make the voting process more convenient for the participants.

As per claim 2, WAGICS Evaluation Report does not explicitly teach how the preliminary information is acquired, but the tables show that information was collected to develop preliminary findings of the workshop (principles). It would have been obvious to one of ordinary skill in the art to use several methods to acquire information including a plurality of questionnaires, and acquiring a second set of information from at least one of a plurality of interviews and at least one document review, to develop the plurality of preliminary findings, since it is well known in the art that various methods can be used to collect information. By using several methods of information collection the organization would ensure that the principles evaluated showed a true representation of the workshop and areas that may or may not be a concern for future improvement.

As per claim 3, WAGICS Evaluation Report does not explicitly teach how the preliminary information is acquired, but the tables show that information was collected to develop preliminary findings of the workshop (principles). However, it is old and well known

Art Unit: 3623

to evaluate information collected and determine if more information is needed. By collating the first set of information, identifying at least one of a preliminary finding and information for further review, and acquiring a second set of information at least partially based upon the information for further review, the organization would ensure that the principles evaluated showed a true representation of the workshop and areas that may or may not be a concern for future improvement.

As per claim 4, WAGICS Evaluation Report teaches the voting comprises voting by a plurality of participants for a conclusion based upon each preliminary finding (table 3, page 6 – participants assess their agreement or disagreement with each of the principles; page 2 shows some of the methods used to collect participant opinions). While the Report does not explicitly teach voting occurs anonymously, it is old and well known for a participant to fill out survey responses without identifying himself. By anonymously voting, or completing the survey, one can reflect their honest opinions thereby making the results more accurate.

As per claim 5, WAGICS Evaluation Report teaches voting comprises voting by at least one assessor and at least one member of the organization (page 1, the ELSI (Ethical, Legal and Social Implications branch) put on the workshop and members of the ELSI participated in the assessment (2nd paragraph) as well as the participants of the workshop).

As per claim 6, WAGICS Evaluation Report teaches voting further comprises voting for a valuation associated with each preliminary finding, wherein the valuation associated with each preliminary finding is selected from a group consisting of an agreement with the characterization of the preliminary finding and a disagreement with the associated characterization of the preliminary finding, and wherein said developing the plurality of final findings are further based

Art Unit: 3623

upon said voting for the valuation based upon the characterization associated with each preliminary finding. (table 3, page 6 – participants assess their agreement or disagreement with each of the principles; the table reflects the final findings wherein percentages are used to show overall agreement or disagreement with each of the principles)

Claims 7-12 are the computer program product for performing the method of claims 1-6, respectively. While the WAGICS Evaluation Report does not explicitly teach a computer program used to collect information, vote and present results, it would have been obvious to one of ordinary skill in the art at the time of the invention to automate the known process of collecting information, voting and displaying results since it has generally been recognized that merely providing an automatic means to replace a manual activity which accomplishes the same result is not sufficient to distinguish over the prior art, *In re Venner*, 262 F.2d 91, 95, 120 USPQ 193, 194 (CCPA 1958).

As per claim 13, while the WAGICS Evaluation Report does not explicitly teach the first executable portion is adapted to at least partially acquire information via a wide area network (WAN), wherein the second executable portion is adapted to present the plurality of developed preliminary findings via the WAN, and wherein the third executable portion is adapted for voting via the WAN, it would have been obvious to one of ordinary skill in the art at the time of the invention to conduct the process using a network such as the Internet since the Internet would allow the organization to collect information, present findings and perform voting from anywhere in the world.

As per claim 14, while the WAGICS Evaluation Report does not explicitly teach the use of a WAN comprising the Internet, it would have been obvious to one of ordinary skill in the art

Art Unit: 3623

at the time of the invention to conduct the process using a network such as the Internet since the Internet would allow the organization to collect information, present findings and perform voting from anywhere in the world.

As per claim 15, Evaluation Report teaches acquiring information concerning the organization and the process (table 3, page 6 – the principles that are evaluated are inherently reflective of the organization and the process); developing a plurality of preliminary findings based upon the information, wherein each preliminary finding has an associated characterization (table 3, page 6 – the principles that are evaluated are inherently characterize the organization and the process); voting for a valuation associated with each preliminary finding, and wherein the valuation is selected from a group consisting of an agreement with the characterization of the preliminary finding and a disagreement with the characterization of the preliminary finding (table 3, page 6 – participants assess their agreement or disagreement with each of the principles); and developing a the at least one assessment, wherein each assessment has the characterization, and wherein the associated characterization of each assessment is based on the voting for the valuation associated with each preliminary finding (table 3, page 6 – the table reflects the final findings wherein percentages are used to show overall agreement or disagreement with each of the principles). While the WAGICS Evaluation Report does not disclose that the voting occurs electronically, it is old and well known in the art of survey and evaluation to collect responses in several methods including electronic form. It would have been obvious to one of ordinary skill in the art to perform the voting step electronically to speed the process and to make the voting process more convenient for the participants.

As per claim 16, WAGICS Evaluation Report does not explicitly teach how the preliminary information is acquired, but the tables show that information was collected to develop preliminary findings of the workshop (principles). It would have been obvious to one of ordinary skill in the art to use several methods to acquire information including a plurality of questionnaires, and acquiring a second set of information from at least one of a plurality of interviews and at least one document review, to develop the plurality of preliminary findings, since it is well known in the art that various methods can be used to collect information. By using several methods of information collection the organization would ensure that the principles evaluated showed a true representation of the workshop and areas that may or may not be a concern for future improvement.

As per claim 17, WAGICS Evaluation Report does not explicitly teach how the preliminary information is acquired, but the tables show that information was collected to develop preliminary findings of the workshop (principles). However, it is old and well known to evaluate information collected and determine if more information is needed. By collating the first set of information, identifying at least one of a preliminary finding and information for further review, and acquiring a second set of information at least partially based upon the information for further review, the organization would ensure that the principles evaluated showed a true representation of the workshop and areas that may or may not be a concern for future improvement.

As per claim 18, WAGICS Evaluation Report teaches the voting comprises voting by a plurality of participants for a conclusion based upon each preliminary finding (table 3, page 6 – participants assess their agreement or disagreement with each of the principles; page 2 shows

Art Unit: 3623

some of the methods used to collect participant opinions). While the Report does not explicitly teach voting occurs anonymously, it is old and well known for a participant to fill out survey responses without identifying himself. By anonymously voting, or completing the survey, one can reflect their honest opinions thereby making the results more accurate.

As per claim 19, WAGICS Evaluation Report teaches voting comprises voting by at least one assessor and at least one member of the organization (page 1, the ELSI (Ethical, Legal and Social Implications branch) put on the workshop and members of the ELSI participated in the assessment (2nd paragraph) as well as the participants of the workshop).

As per claim 20, WAGICS Evaluation Report teaches voting further comprises voting for a conclusion associated with each preliminary finding, wherein the conclusion associated with each preliminary finding is selected from a group consisting of an agreement with the characterization of the preliminary finding and a disagreement with the associated characterization of the preliminary finding, and wherein the at least one assessment is further based upon said voting for the valuation based upon the characterization associated with each preliminary finding. (table 3, page 6 – participants assess their agreement or disagreement with each of the principles; the table reflects the final findings wherein percentages are used to show overall agreement or disagreement with each of the principles)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johnna R. Loftis whose telephone number is 571-272-6736. The examiner can normally be reached on M-F 8am-4:30pm.

Art Unit: 3623

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on 571-272-6729. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
